An online phone book, like the Telkom phone book, provides a quick way to look up numbers of people and businesses you want to call or locate. You can search these sites by name, keywords or location and, sometimes, you can enter a phone number to do a reverse search. Telkom Cell Phone Contracts As Africa's biggest integrated telecommunications company, Telkom mobile contracts are also part of the company's offerings. One way to access an online phone book is through the browser of your mobile device. To do this, open your device and run a search for either a specific online directory, such as Telkom or WhitePages. Then, find the search box and enter the name of the person or business you want to call. Results to Expect If you're searching in the Telkom directory, expect to find the name, address and phone number of the party you want to call, if they have a listed number. Other information that may be included if you're looking up a business is the company profile and a link to the company website. If you're looking on a site with a map function, you may also see a map with the location pinned and an option to get turn-by-turn directions to the place you're calling. Reverse Phone Number Lookup A reverse phone number lookup is done when you have only a phone number and want to know who it belongs to before you call. To do a reverse number lookup, choose a site that offers the service, such as WhitePages, navigate to the phone lookup section and enter the number. Some results may be free, while others may require a fee to unlock the information. Reverse Address Lookup A reverse address lookup is another type of search you can do if you only have part of the information about the number you need to find. To do it, you enter the house number and street in one search box and the city and state or zip code in the second search box before running the query. This type of search doesn't deliver consistent results, though it can be useful and delivers some results in map or satellite form. Brief History of Phone Books The first printed phone book was handed out in 1878 in New Haven. It was a single printed card with some numbers printed on it. The printed phone books grew in popularity during the decades and centuries. Then, in 2005, the demand for printed phone books started to drop. By 2017, many states in the United States had even made it illegal to print phone books, according to TruthFinder. MORE FROM QUESTIONSANSWERED.NET
